## HAND-BUILT CEDAR STRIP CANOE

### The Design

This boat is a cedar strip canoe, which describes the method of construction. The design is referred to as Nipmuc, after indigenous Algonquian peoples of New England.

### Special Features

The shape & beauty of this canoe is defined by its wood core. It is fiberglassed inside and out, imbuing it with strength and protection from the sun's UV rays. As a result this canoe requires significantly less maintenance than a wood boat.

### DONATION PER ENTRY

All contributions will go toward the support of the Allegheny Highlands Council, BSA and their mission to support Scouting throughout the region.
